

PRESENTATION ABSTRACT

Presentation topic: State-of-the-art rubber components for critical pharmaceutical applications

Speaker:

Luc Bastiaens
Area Manager

Company:

Helvoet Pharma

Helvoet Pharma

Helvoet Pharma, the pharmaceutical packaging division of the Swiss Dätwyler holding, is a leading manufacturer of rubber and aluminium components for injectable drugs, medical devices and diagnostic systems.

Via organic growth and acquisition, Helvoet Pharma at present has in total 5 plants for production of rubber components and aluminium seals in Europe and the US. All together, more than 12 billion components are supplied worldwide. With a yearly turnover of >170 MM €, Helvoet Pharma is a global supplier to the pharmaceutical, biotech, medical device and diagnostic market.

FirstLine™

By investing in a brand-new state-of-the-art production unit, together with a quality control system incorporating the latest ISO 15378 standard, Helvoet Pharma is setting a new benchmark in the manufacturing of closure components for parenterals.

The FirstLine™ range is the result of this evolution. As the cleanest components available FirstLine™ products remove the need for expensive processes in the preparation of primary packaging components, providing lower inspection costs, even better quality and improved productivity.

This state-of-the-art production will produce high-level quality products, such as Helvoet Pharma's latest development Omniflex3G.

omniflex3G

With this innovation, Helvoet Pharma has fused its Omniflex fluorinated polymer coating together with its ultra-clean FM457 compound to form the latest major advancement in rubber closure technology.
